DDI SUPPORT TO WHITE HOUSE TASK FORCE ON NARCOTICS

1. During the past year support provided by the Intelligence Directorate to the White House Task Force on Narcotics and Dangerous Drugs has been accomplished primarily through informal arrangements within the Directorate and with the Agency representation on the Task Force. Task Force requirements have increased in scope and urgency, and it has become apparent that closer coordination is required within the Directorate. Although it is of course desirable that effective intelligence support be given the Task Force, such production can be expected to compete for resources with other priority requirements. It is, therefore, essential that the several Offices concerned have a clear understanding of the priority attached to a given request, and that they be afforded an adequate opportunity to review Task Force requests for production before they are accepted.

2. In order to achieve these results, effective this date [redacted] OCI, is designated coordinator for DDI support to the Task Force and all other DDI activities in the narcotics field. [redacted] OER, is designated alternate coordinator.

3. All requests for support normally will be channelled through [redacted] In consultation with the concerned Offices, and as appropriate with the Office of the DDI, he will accept or decline such requests on behalf of the DDI. In the event that a request is received by a DDI component outside this channel, [redacted] should immediately be advised so that he can ensure that full coordination is achieved.
